One-Semester Career Certificates at SUNY Suffolk

Empowering Rewarding Careers on Long Island

Regional manufacturers and organizations continually rely on SUNY Suffolk to train or enhance the skills of workers to increase their productivity and grow their operations. Companies regularly recruit students right out of our workforce training programs.

“We find ourselves looking to you for employees more and more each year. The need for welders in all areas is paramount now more than ever. Welding is a financially lucrative field with guaranteed long-term job security. Programs, such as yours, must have the leading technology to attract and retain the future workforce.”

Paul Siller, President
Westhampton Architectural Glass

“Your former student has been working for us since December 2021 and we are very happy with his progression. You did a nice job getting him prepared for this type of environment and, coupled with his positive attitude, it has made it easy for him to learn our processes and techniques, making him a valued employee.”

Rich Rositano, Operations Manager
Innovative Power Products

“Through the training that they received at the college, Suffolk students have been able to come onboard and continue with their development. Many have been promoted and hold critical positions within our company.”

Greg Santi
Human Resources Manager
Curtiss-Wright

Learn, Then Earn!

It doesn't have to take long to find a rewarding career. The Workforce Training Center at Suffolk County Community College offers semester-long programs that are designed to provide students with the skills needed to be immediately employed in areas that include:

Welding

Computer Numerical Control (CNC) Machining

Soldering and Electronic Assembly

Suffolk's Workforce Training students are led by instructors with current field experience and learn to use today's advanced technologies and leading-edge industrial equipment within the college's state-of-the-art facility on the Michael J. Grant Campus in Brentwood.

Training programs are designed for both new students and current workers who would like to enhance their skills. At the semester end, students receive a Completion Certificate, as well as the opportunity to achieve national and international certifications.

This is an opportunity for hands-on, skills-based training in honorable careers in countless industries, including aerospace, automotive, construction, manufacturing, marine shipping, railroads, and more. Upon completion, most students are able to enter into the job market, while others may decide to move into technology-related college credit programs.

To get started, simply contact Suffolk's Workforce Training Specialists at 631-851-6200 or email advmfg@sunysuffolk.edu today.
